

Innova Design, Inc.

Focusing on developing intelligent manufacturing equipment for interventional medical devices

Developed in the USA. Serve the World

Innova Design, Inc. (IDI), located in San Diego, California, USA, focuses on developing and manufacturing high end and intelligent equipment for interventional medical device manufacturing. After more than 20 years of technological accumulation, IDI has become the leading provider and pioneer ever since it developed the first commercial catheter laser bonder in 2002.

Currently, the catheter laser bonders developed by IDI have entered its 6th generation. The laser bonders from IDI have been used in the manufacturing of millions of balloon catheters. More than 100 customers including most of the major catheter manufacturers spreads in more than 10 countries including the US, China, Japan, Ireland, Brazil, and Singapore. With their exceptional capabilities, stability and repeatability, our machines have been able to provide diversified solutions for the customers in developing their manufacturing processes and increasing productivity. For that reason, IDI has become the top choice provider for Medtronic, Microport, Lepu, Boston Scientific, etc. Through many years of technical development, IDI's product line has become more and more complete.

Our product lines include the following:

LBS4000, LBS5000, and LBS6000 series Catheter Laser Bonders

CLS2000 and CLS3000 series Catheter Laminators (Reflow machines)

SBF1000 series integrated Balloon Former and Tuber Necker

UCS1000 and UCS2000 series Ultrasonic Coating Equipment

HBS1000 Hot Box System

Polyolefin heat shrink tubing

Provide complete solutions for catheter development and manufacturing

Why Innova Design?

- More than 20 years of accumulated experience in the development and manufacturing of equipment for interventional medical devices
- First in the world in the commercialization of catheter laser bonders. Pioneered the technology since 2002
- Equipment used by more than 100 customers. Equipment used in the manufacturing of millions of balloon catheters
- Ours team include pioneers of laser bonding technology and experts in catheter manufacturing
- Can offer customization and special technical services for diversified customer requirements
- Provide exceptional post-sale services for our equipment
